LightSYS™2

FEEL CONNECTED
All of the Time

LightSYS 2

FEEL CLOSE Even when Far

Now you can protect your home and family with a comprehensive security system that offers you so much more. Feel in control even when you are away with an easy to use smartphone app enabling you to control the system remotely and receive notifications regarding its status.

If there is an alarm event, you or your security provider will receive video clips or still images of your home so that you can determine if there is a real threat and if you need to take further action. You can also initiate live video anytime with the touch of a button if you have any concerns, to ensure that your home and family are safe.

See the **FULL PICTURE**

Whether near or far, you can now feel in touch with what is happening in your home.

By installing V3point IP cameras, available in both indoor and outdoor models, you can verify that your children arrived home safely from school or check on an elderly parent, simply by using our smartphone app, so that you can feel totally at ease.

If there is an alarm event, whether a suspected intrusion or a safety threat, you will receive a real-time notification with video clips or still images of your home, directly to your smartphone, so that you can decide if and how to react.
