

# LightSYS+ Plug-In PSTN Module

Model: RP432PSTN00A

---

The plug-in PSTN module enables the panel to communicate with a central station (ARC) using common format protocols (SIA, Contact ID). The PSTN module can be used as a primary communication channel or as a back up to the Cloud connection, in case of communication failure. The module should be plugged into the GSM/PSTN module slot on the LightSYS+ panel. In installations that require both PSTN and GSM modules, the GSM module should be installed on the COB (Cellular on Bus)

## Technical Information

- Power Supply: 13.8 VDC
- Current Consumption:
- Standby: 30mA
- Comm.: 100mA
- Operating Temperature:  $-10^{\circ}\text{C} > 55^{\circ}\text{C}$  ( $14^{\circ}\text{F} > 131^{\circ}\text{F}$ )
- Storage Temperature:  $-40^{\circ}\text{C} > 60^{\circ}\text{C}$  ( $-40^{\circ}\text{F} > 140^{\circ}\text{F}$ )
- Relative Humidity:  $\leq 75\%$
- Dimension : 88mm x 52mm x 16.5 mm
