

RED Ceiling Pull Cord

Details

- Non-latching RED ceiling pull cord with re-assurance LED for use directly with AIDLARMS above.
- This unit has voltage free SPCO contacts.
The LED incorporates a current limit resistor for use on 12vdc.
- The cord is 2.5metres long.
However, it is considered against best practise to install a non anti ligature pull cord into a mental health unit due to the risk it poses.
- Call buttons in the toilet or Panic strip is recommended
