Smart Home

# MANAGE YOUR LIFE THE SMART WAY

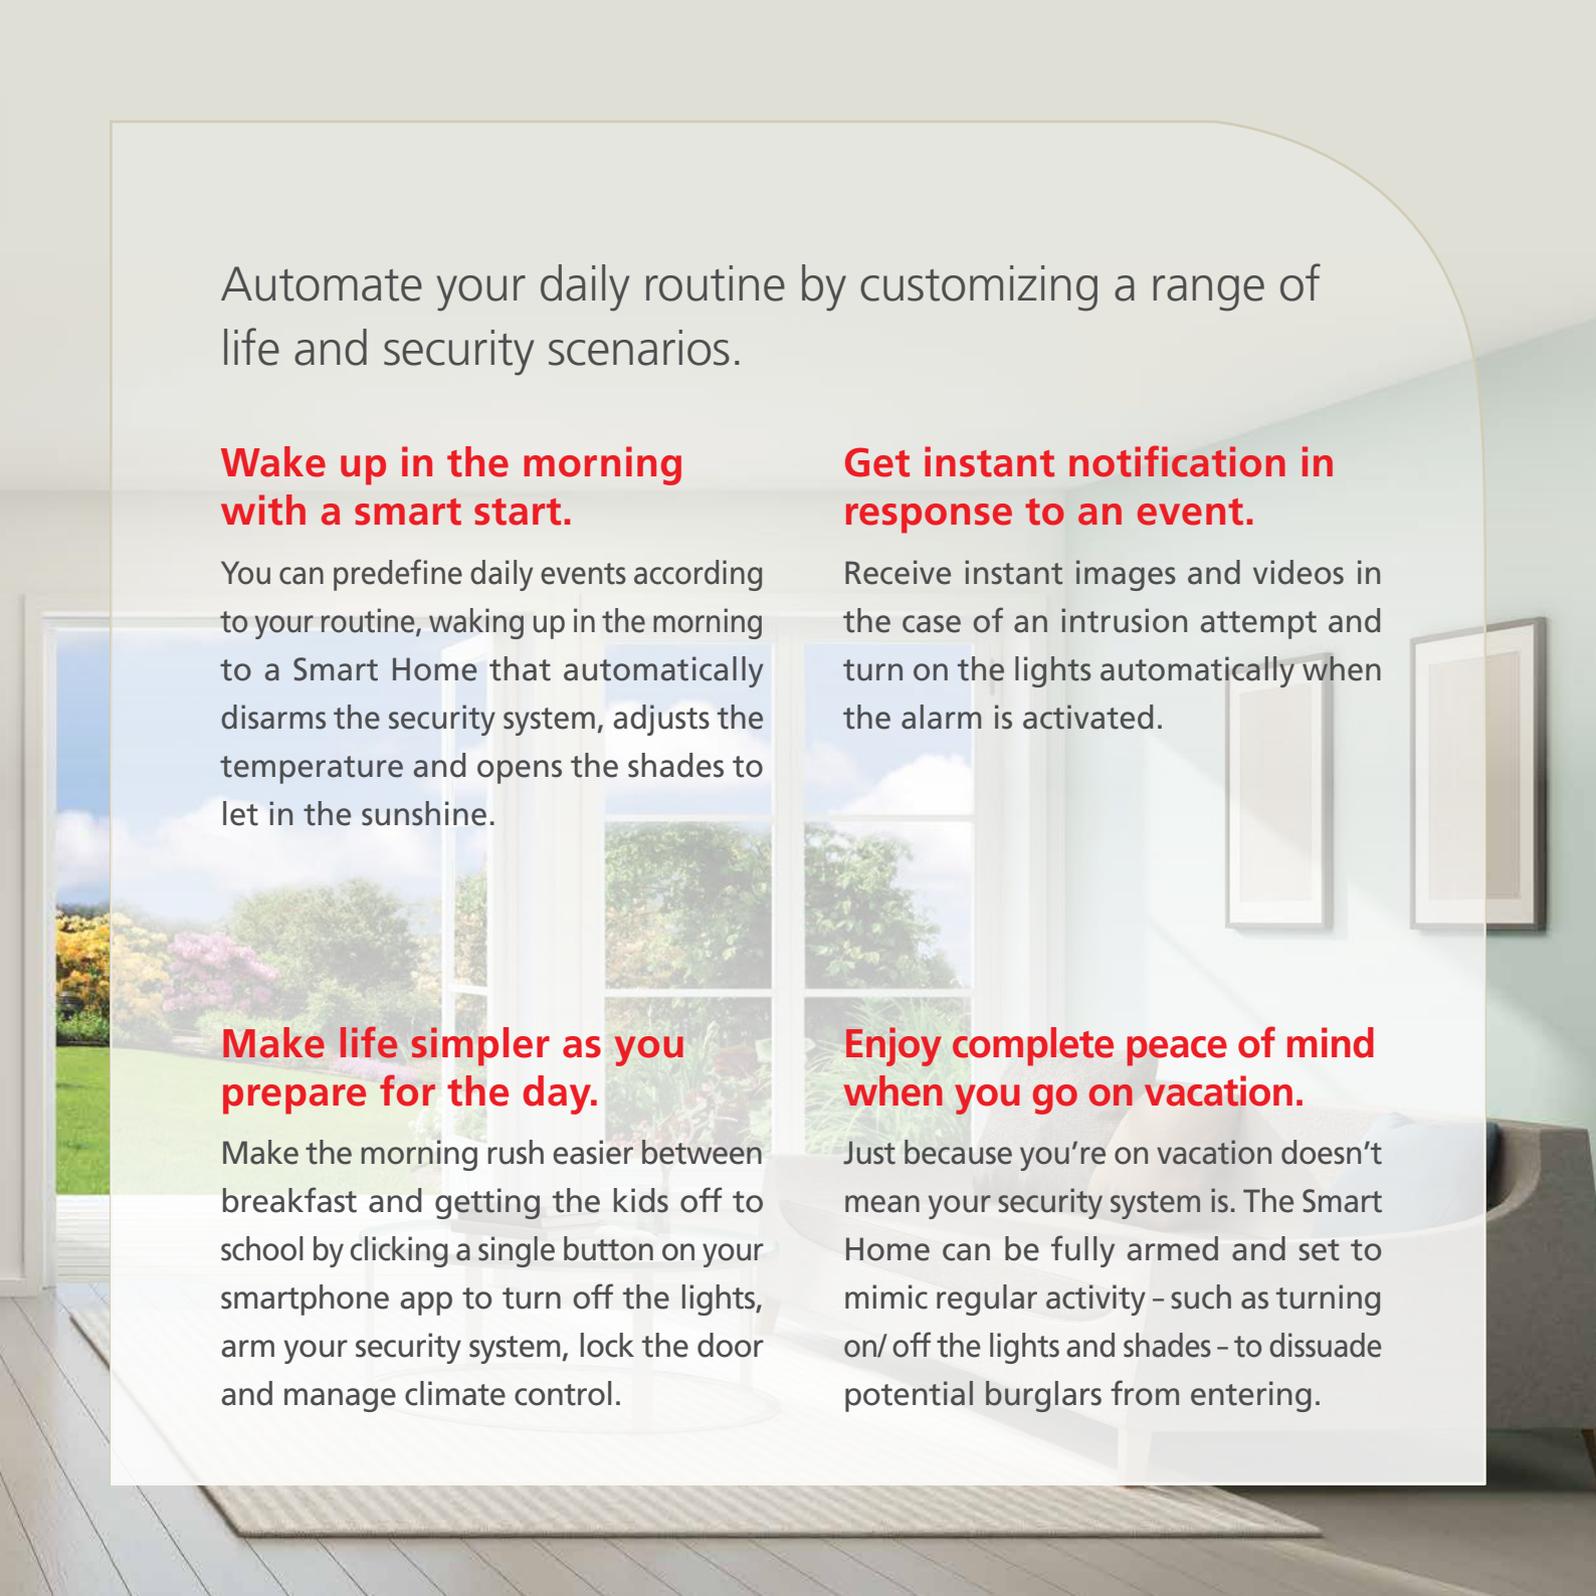

## Smart Home

Manage your life the smart way with an affordable connected home solution that combines a Smart Home, professional security and video monitoring with easy-to-use technology for total convenience and peace of mind.

Get the full package of cost-saving energy efficiency with smart temperature control, smart access of door locks and garage doors, and control of lighting, shutters, and appliances - all managed from a single, intuitive smartphone app!

Enjoy full control of your security, safety, and Smart Home features directly from a single intuitive app. The iRISCO smartphone app provides you with convenient control on the go for total life management.

Automate your daily routine by customizing a range of life and security scenarios.

**Wake up in the morning with a smart start.**

You can predefine daily events according to your routine, waking up in the morning to a Smart Home that automatically disarms the security system, adjusts the temperature and opens the shades to let in the sunshine.

**Make life simpler as you prepare for the day.**

Make the morning rush easier between breakfast and getting the kids off to school by clicking a single button on your smartphone app to turn off the lights, arm your security system, lock the door and manage climate control.

**Get instant notification in response to an event.**

Receive instant images and videos in the case of an intrusion attempt and turn on the lights automatically when the alarm is activated.

**Enjoy complete peace of mind when you go on vacation.**

Just because you're on vacation doesn't mean your security system is. The Smart Home can be fully armed and set to mimic regular activity - such as turning on/ off the lights and shades - to dissuade potential burglars from entering.

Lighting

Garage Door

Water Boiler

Smart Access

Climate

Shutters

Cameras
