Elegant Keypad

The Elegant Keypad is RISCO Group's contemporary, touchscreen keypad that is extremely responsive and reliable, and is compatible with all of RISCO Group's wired and hybrid intrusion systems.

The Elegant Keypad is designed for simple installation with a removable back plate and without the need to open it in order to wire cables to the terminal block or to set the dipswitch address.

Available in snow white or midnight black, the Elegant Keypad is an attractive, state-of-the-art accessory for your intrusion system.

Elegant Keypad Flush Mount

The Elegant Keypad Flush Mount is a sleek, flat frame that is complementary to the touch screen Elegant Keypad series. The Elegant Keypad Flush Mount Kit is easy to install and provides an unobtrusive design with its subtle interior mounting structure. The smooth exterior is available in classic colors: black, white, and gray.

The new Flush Mount is designed to support the Elegant Keypad's back tamper for top security standards. If the Keypad is forcibly removed from the Flush Mount, a tamper alarm will be immediately triggered.

Unobtrusive and easy to fit, the Elegant Flush Mount is the perfect choice for your sophisticated security system installation.
