# Apps for PROs

With Ajax PRO apps, teams have everything to administer, configure and monitor alarms of an unlimited amount of hubs. At the office, in the field, and on the go. All accounts are constantly in sync.

Set alarm monitoring stations

Coordinate the work of a team

Swiftly verify alarms with photos from MotionCam detectors

Create new security objects and connect equipment

Test communication and detectors

Add/remove users and manage their access to settings

Search and filter the log of events

Connect video cameras and DVRs

Create arming/disarming schedules for the whole system or selected groups of devices

Configure alarm reactions for automation devices

Configure the alarm confirmation algorithm
